

It's too bad that this country is leaning towards the government running the people instead of the people having a choice! Don't forget where your roots come from. If broadcast radio can't compete, too bad! Instead of companies running to big brother to bail them out, (that's pretty lame!) they should find ways to improve themselves. This society is all about freedom, freedom to compete, freedom to choose, and freedom to enjoy life! It wouldn't be fair for a company or organization to Monopolize a service or product and not give people the freedom to choose. I still listen to broadcast in addition to my XM radio. Look at kodak. They could have tried to stop the advancement of digital cameras for their own interest (maybe they did), but they got on the bandwagon and developed (no pun intended) or farmed out for their own line of digital cameras, and are competitive with companies that do the same. I think the government should take a hard look at the cry babies in the world, but most importantly, take care of more important issues like homeland security and child hunger instead.

Live freedom to its fullest,

Douglas
